### **Use Responsibly**

1. Do not use headphones when it's unsafe to do so – while operating a vehicle, crossing streets, or during any activity or in an environment where your full attention to your surroundings is required.
2. It's dangerous to drive while wearing headphones, and in many places, illegal because it decreases your chances of hearing life-saving sounds outside of your vehicle, such as another car's horn and emergency vehicle sirens.
3. Please avoid wearing your headphones while driving. Use one of Monster's FM transmitters to listen to your mobile media devices instead.
4. Learn how to establish a safe listening level and review other important safety guidelines from the Consumer Electronics Association at [www.ce.org](http://www.ce.org) and the Deafness Research Foundation at [www.drf.org](http://www.drf.org).

## **Installing SuperTips onto Your Headphones**

To install, with the rounded end facing out, slide SuperTips onto the earpipe of your headphones, making sure they are pushed on until completely seated.

If the earpipes on your headphones are narrow and the SuperTips are loose and don't stay on, use the included adaptors.

Slide the adaptors onto the earpipe first, completely encasing the earpipe, then install SuperTips as described above.

**Note:** If the earpipe of your headphone extends out past the end of SuperTips, you have pushed them on too far.

## Proper Headphone Insertion

Proper insertion of your headphones into your ears will make the difference between good sound and great sound. With SuperTips providing the right seal, you'll get better isolation from unwanted outside noise, increased bass response, better tonal balance and your headphones will stay in your ears better.

1. Install SuperTips onto your headphones, as described in the previous section.
2. Using your right hand, grasp the right headphone.
3. With your left hand, pull up and back on your right ear to straighten your ear canal.
4. Carefully insert your right headphone so that it seals completely and comfortably in your ear. Do NOT insert the headphone so deeply that your ear canal feels completely "plugged."

## **Fit Testing**

A good way to gauge whether or not the SuperTip is sealing properly in your ear canal is by snapping your fingers right next to your ear. If the seal is proper, your ear will not feel "plugged," yet the snapping of your fingers will sound dull and distant. If you hear your finger snaps distinctly, the seal is probably not adequate. If the sound of your finger snapping is dull and distant, but your ear feels plugged up, like you're on an airplane preparing to land, then you've over-inserted the SuperTip.

## **Using SuperTips on Flights or At High Altitudes**

When using SuperTips at different altitudes, the air pressure within your ears may change, thereby changing the sound that you hear from the headphones. This is especially true with the gains and drops in altitude during airplane travel. To help with this, occasionally break the seal and re-insert your headphones into your ears. Another helpful tip is the common exercise of holding your nose and very gently blowing through it, which can relieve some of the pressure in your ears.

## **Cleaning SuperTips**

Keeping your SuperTips clean is essential for safe, hygienic use.

**IMPORTANT: DO NOT** attempt to clean the SuperTips without first removing them from your headphones. Getting the delicate circuitry inside your headphones wet may cause permanent damage.

### **SuperTips Gel**

1. Remove SuperTips Gel from your headphones.
2. Use warm water and mild soap on a damp cloth to remove dirt and earwax from SuperTips. Do **NOT** use harsh cleaning agents or alcohol.
3. Rinse and completely dry SuperTips Gel before placing them back on your headphones
4. Reinstall SuperTips Gel on your headphones, making sure they are on the earpipe completely.

## SuperTips Foam

Because foam is an absorbent material, extra care should be used cleaning them to avoid water soaking into the tip. You should not clean them in the same manner as SuperTips Gel. Do **NOT** use cleaning agents and do not submerge SuperTips Foam.

1. Remove SuperTips Foam from your headphones.
2. Using a cloth or paper towel dampened with water only, wipe the exterior, removing any earwax build-up.
3. To clean inside of the sound tube portion, insert a rolled up piece of cloth or paper towel into the tube and remove build up.
4. Let SuperTips Foam completely dry before placing them back on your headphones.
5. Reinstall SuperTips Foam on your headphones, making sure they are on the earpipe completely.

### **Revolver Eartip Case**

Your SuperTips include a Revolver Eartip Case to avoid losing your extra SuperTips. Simply push the SuperTips into the slots. To remove, push on the back of the case.
